COTTON MARKETS.

NEW YORK, June 11.—The cotton market was nervous and unsettled to-day, and while the closing tone was steady last prices showed a net loss of \$8712 points. The opening was steady at a decline of 4 points on November, but generally unchanged to 2 p-ints higher in response to steady Liverpool cables. Early fluctuations were somewhat irregular, but the market cased off under selling by Western interests, scattering liquidations and local bear pressure, which was encouraged by good weather reports, the absence of bull support and apprehensions of further weakness in July. After showing a net loss of about 55% boints the market ralled to practically the closing figures of yesterday on private reports of rain in the Central bell, but the detailed weather reports allowed no important precipitation in this section, while

ber options showed slight gains.

The corn market was nervous nearry all day in sympathy with the sudden turns in wheat. Weather conditions were more favorable for the new crop and official forecast was for fair weather generally throughout the corn belt.

Oats were weak on the general selling, owing to the bright prispect of the new crop. The market closed weak with prices off 1,6 ½c.

Provisions were easy at the start because of increased receipts of live hogs, but hecame firm during the last hal fof the day. Final quotations showed gains of 5@12½c.

Trade Conditions

NEW YORK, June 11 -R. G. Dun & Co.'s Weekly Review of Trade to-mor-Co's Weekly Review of Trade to-mor-row will say:
"Further progress is making toward business confidence and activity, and even the vexatious delay in the treat-ment of the tariff and somewhat dis-appointing June crop statement have not served to check the improvement. "Statistics of pig fron production during May furnish additional evi-dence of the betterment of fron and steel.

dence of the betterment of iron and steel.

"Greater interest and larger volume of actual transactions are observable in the primary cotton goods market than for a long time past. Jobbers are the principal operators although the market as a whole still continues to be somewhat uneven. In the woolen goods division interest at present centres in the opening of staples by the leading producer.

"Demand as a whole shows an improvement in shoe conditions."
